Art Unit: 1764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 6-8, drawn to a desalination method for raw water classified in class 203, subclass 22.
- II. Claims 9-22 drawn to a desalination apparatus, classified in class 202, subclass 176.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practised by another materially different apparatus such as : a vacuum evaporation- type -desalination apparatuses which use a flash system or multi-effect system as described at page 2 in the instant specification as well as distillers using solar energy or microwave heating and etc., and therefore the apparatus is not limited to the apparatus as embodied in the group II invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1764

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
